Customization IS OUR SPECIALTY...

We'll customize our designs to fit your existing work area!

It's your feedback that allows us to create a solution for you. We specialize in working together with hospitals to solve common and unique problems and have generated amazing results. Let us help you address the major operational issues facing hospital of the 21st century.

Why Choose CENTiCARE?

With the combination of skilled engineering, dedicated craftsmanship and the finest materials available, CENTiCARE has been producing quality healthcare equipment for over 25 years. Our mission is to provide quality equipment, excellent service and creative solutions to the healthcare industry at a competitive price.

Our product lines have evolved in response to the ever-changing conditions and demands of our customers. As technology and equipment progress, we work with our customers to make new and newer technology more compatible. Our design team will work with you to find appropriate dimensions and product solutions for your department and facility.

We offer a wide variety of product lines for use in hospitals, clinics and extended care facilities. Many of our products are modular in design, and can be fully customized for your facility's needs. These products include PVC and Stainless Steel Hampers, Linen Carts, Phlebotomy Carts, IV Poles, Shower Chair Commodes, Equipment Stands and various accessories for each product line. Due to the modular design, the equipment will not need to be taken out of service when adding accessories or updating parts. In addition, most of our custom products can be modified for MRI compatibility.

All of our equipment is proudly designed and manufactured to meet and exceed the service conditions and expectations of the most demanding facilities in the healthcare industry. Choosing CENTiCARE products is an investment in reliable, quality equipment so your staff can focus on your patients.

Shipping Info

We ship with various carriers all over the world. Please call for a list of available carriers and details.

Let CENTiCARE help with your custom projects

Step 1: CENTiCARE is presented with a problem they are currently having with an existing product or a new project.

Step 2: Our engineers work with clients to brainstorm ideas, take pictures and gather dimensions. Then we produce CAD drawings.

Step 3: After the CAD drawings are approved, our production team produces a working prototype for the client's approval.

Step 4: After the prototype has been approved, we work with the client on production timelines, quantity needed, safety stock requirements and any other details needed to deliver exactly what the client wants, when the client needs it.

Are you a manufacturer or distributor of a product that needs mobility?

As an Original Equipment Manufacturer (OEM), we are committed to producing the safest and best instrument stands available. We have produced a wide variety of stands that support everything from patient transfer systems to video game units.

If you are an OEM and are in need of a new stand design, please contact our sales and marketing department.
