

SPECIALTY PROCEDURE & TREATMENT SERIES

IV THERAPY CART

Central mast with 4-hook rake top keeps lines organized.

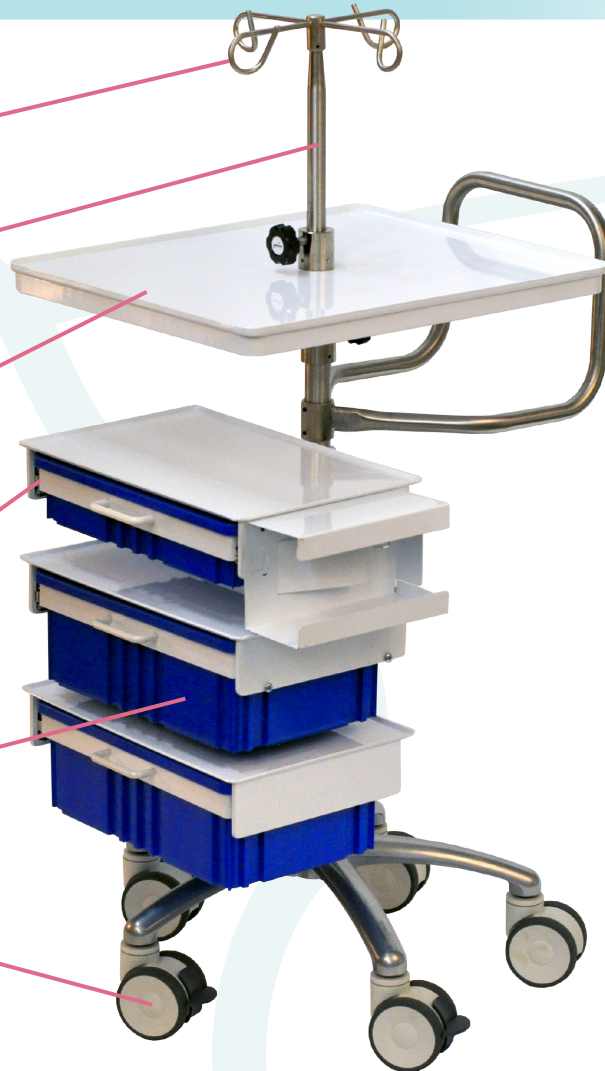

Auto-lifter allows cart to easily adjust to the best working height.

Fully lipped edge is the perfect working surface for intra-venous care.

Every component can be taken apart and cleaned to reduce nosocomial and other HAI's.

All drawers and accessories are easily adjustable for best workflow and LEAN practices.

4" twin wheel casters are quiet and traverse elevators with ease.

Experience the Ease of Supply Centralization!

The IV Therapy Cart is strategically crafted to start up to 4 lines at once. Delivering the best in intra-venous care, it accommodates all of the intricate lines and accessories that go along with providing care. The central mast has a 4-hook rake top IV pole which organizes the lines and allows technicians to prepare IV medication for therapies and related procedures.

Every piece of these carts can be taken apart and cleaned to reduce nosocomial and other HAI's that present such large difficulties in the current hospital environment. These carts are truly built to last a working lifetime!

Features & Benefits:

- Anti-microbial working surface with a continuous lipped edge
- 3 drawers with lipped edge, universal dividers, combination locks
- Side mounted glovebox
- Auto-lifter (adds up to 10" of height to the central mast)
